# Why it matters?

The presence of images is known to affect positively fundraising in crowdfunding projects.

*“Adding compelling fundraising images to your fundraiser page is one of the best ways to become a crowdfunding success story; **fundraisers with at least five photos raise more than those with one.** Photos can tell your story, spark compassion, and inspire action. (GoFundMe)”*

But, what about **image content**?

What is the impact of image content on the success projects?

# Goals

Goal: Prototype system that optimizes image to the success (money raised) of crowdsourcing campaigns on GoFundMe.

- Use an automated strategy to analyze content and process in scale that facilitate more successful campaigns for users on the site
- Analyze impact of image content on domain specific projects (i.e. Business or Charity)

What type of images are related to highest levels of success in projects?

# Methods

## GoFundMe project site

- Business projects: 928
- Charity projects: 999
- Display Image
- Project metadata
  - Money (Raised and Goal)
  - Date of creation
  - Shares
  - Updates

**\$1,575** of \$2,500 goal

Raised by 21 people in 26 months

# Insights/recommendations

## To GoFundMe

- The simple suggestion of changing the content of a image can have an impact in campaign success.
  - This consider difference in domain specific projects.
- Replicate this analysis with images inside of the project description.
- The whole process can be automated on scale to benefit the platform ecosystem:
  - + projects getting money leading to more successful campaigns for users
  - + higher engagement on the site leading to a more active community
